8. Teaching language	☐ French ☐ German ☑ English ☐ Other:			
9. Objectives	Whether it is labelled Mid or Middle Office, Product Control or Deals Desk the role of this function is to monitor, analyze and report the exposure of the trading function. The Middle Office is key to coordinating between the Front Office and the Back Office (operations, finance, contract administration) in Commodity Trading organizations. This course is to prepare students for entry-level positions in the Middle Office and will cover risk management (market, operational & credit), trade monitoring and compliance, order management of the trade life cycle and product control of position and risk limits. In addition, it will introduce students to key supporting Information Technologies in trading such as Commodity Trading & Risk Management (CTRM) software solutions.			
	Upon completion of this course, students will be able to perform a Profit & Loss attribution breakdown, position exposure evaluation and market risk assessments. These skills will enable students to add value and provide valuable information to the Front Office to support decisions related to the commercial activity. The Middle Office			

	reports are essential for traders to make the right commercial decisions and to optimize portfolio opportunities.				
	The Middle Office presents a training ground and important learning experience for Front Office roles.
