Option principale: Commodity Trading

What is Commodity Trading?

Commodities are present in everyday life, from the items we own & use to the food we eat.

- Agricultural & Softs
- Energy
- Metals

Commodity Trading is solving problems in global supply and demand imbalances by managing commodities.

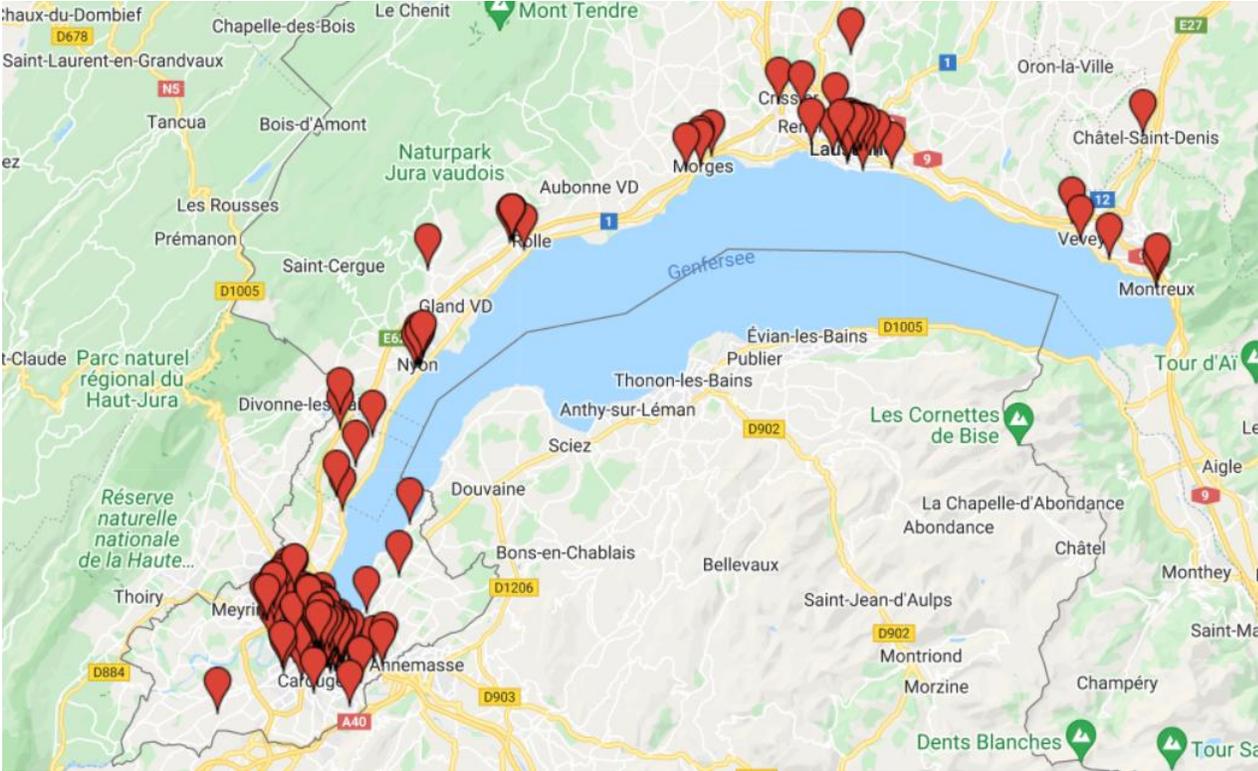

- **Form** – processing, refining and blending
- **Space** – moving from location A to B
- **Time** – market price structure & storage

Why in Geneva?

Geneva is arguably the principal hub for Commodity Trading and a global leader in many Commodities.

Commodity Trading has been present in Switzerland (Geneva) since the Middle Ages, thanks to its advantageous geographical position at the crossroads of European commercial routes.

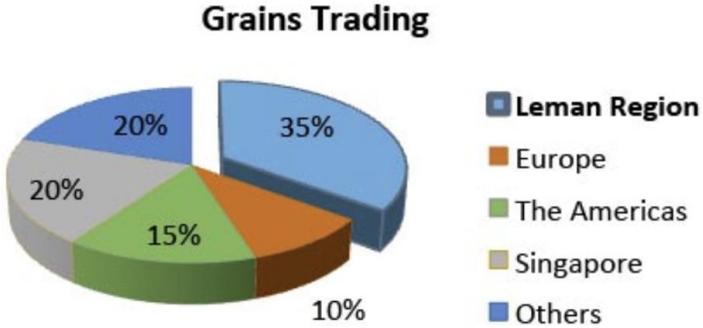

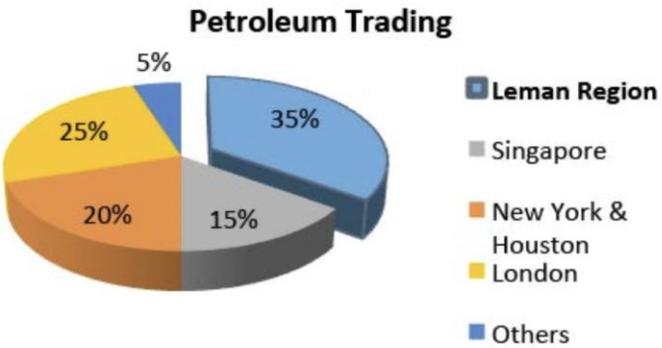

Lac Lemman Region
270 Trading Companies
28 Shipping Companies
34 Service Companies

Switzerland
502 Trading Companies
39 Shipping Companies
34 + Service Companies

Global leader in multiple commodities

- Global leader in volume traded for Oil (Crude and Products)
- Global leader for Grains and Oilseeds
- European leader for Sugar
- Global leader for Coffee
- Global leader in Commodity Trade Financing
- Global leader in Inspection and Certification
- Handles 22% of all commodity global movement

The changing role of Commodity Trading companies

- **Shifting Trade Flows:** recent events have disrupted traditional flow of commodities;
- **Sustainable Agriculture:** climate risk & food supply;
- **The Energy Transition:** decarbonisation of energy sources;
- **Globalisation** → Regionalisation: Security of Supply for Food & Energy;
- **“Trumponomics”:** Tariffs & Trade wars –how will commodities be impacted?

Courses – Option principale

Front Office – How do trading companies make money? Time, Form and Location all present commodity trading arbitrage opportunities. The basics of commodity trading commercial activities including forward curves, hedging tools, market instruments and how to manage price risk.

Physical Trading Operations I– How does a trade transform from a promise written on paper to a delivered and paid for cargo? Covering the key commodity trade flows and market players, this course introduces the foundation of physical commodity trading, including INCOTERMS, contracts, operations and management of the associate risks.

Middle Office – How commodity trading exposure is managed. Introducing the key concepts of product control, position management, Mark-to-Market reporting and Profit & Loss attribution. The increasing role of compliance, regulations and sanctions is also covered in this module.

Physical Trading Operations II – Building on the concepts covered in part I, this course adds more detail. Providing more practical applications and real-life examples of physical trading and the operational risks involved.

Competencies acquired through practical & real-life experiences

Option principale:

**International Economics &
Emerging Markets**

Emerging markets: a major disruption in 21st century economics

Global market rise of emerging economies in Asia, Latin America and ... even Africa !

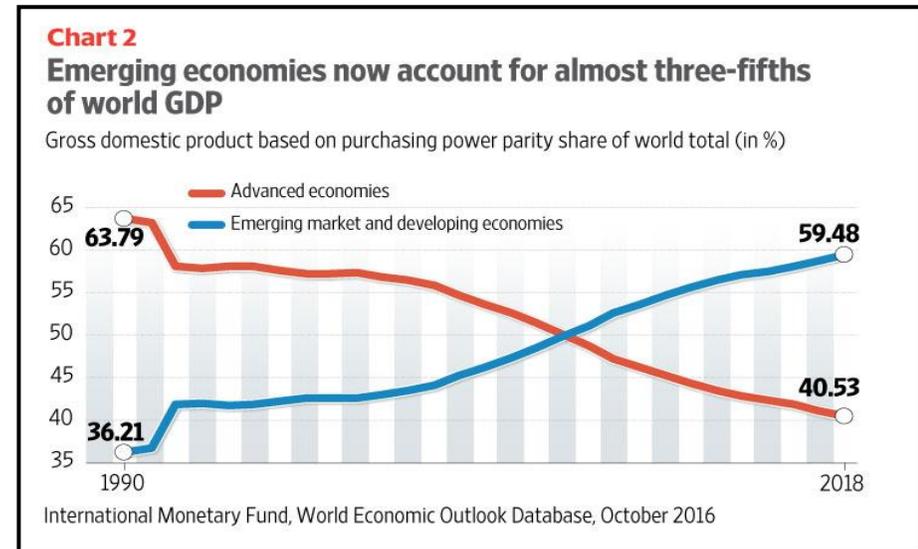

In 20 years, 2 million jobs per month will need to be created in Africa

China will be #1 world economy by 2030 surpassing USA ?!

- In 2023, Switzerland exported 45 billion US\$ to China, and only 20 billion US\$ to France

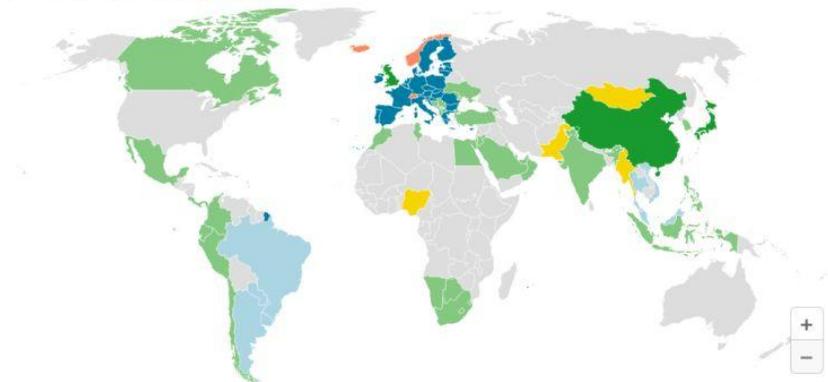

India World 3rd Economy by 2030?

- In March 2024, Switzerland signed free trade agreement with India

Switzerland has signed various bilateral free trade agreements in recent years

Legend: EFTA member states (orange), Free trade agreement (EFTA) (green), Free trade agreement (bilateral) (dark green), Free trade agreement with the EU (blue), Joint declaration on co-operation (yellow), Ongoing FTA negotiations (light blue)
