

PICTET GROUP SWITZERLAND IS HIRING A GRADUATE AI ENGINEER FOR PERMANENT
PERMANENT.

Date : 03/03/2025

Job reference : 121684-43214500

Function : Information Systems/Telecom (Project Manager)

Type of contract : Permanent

Localisation : Geneva 1227, CH

Contract duration : Permanent

Level of studies : Master's Degree

Years of experience : 1-2 years

Company description :

Pictet is an investment-led service company, offering wealth management, asset management and related services. We do not engage in investment banking, nor do we extend commercial loans. We are a partnership of seven owner managers and our principles of succession and transmission of ownership have remained unchanged since foundation in 1805. With more than CHF 509 billion in assets under management or custody at 31 December 2017, Pictet is today one of the leading Europe-based independent wealth and asset managers.

Headquartered in Geneva, Switzerland and founded there, Pictet today employs more than 4,200 people. It has 27 offices in: Amsterdam, Barcelona, Basel, Brussels, Dubai, Frankfurt, Geneva, Hong Kong, Lausanne, London, Luxembourg, Madrid, Milan, Montreal, Munich, Nassau, Osaka, Paris, Rome, Singapore, Stuttgart, Taipei, Tel Aviv, Tokyo, Turin, Verona and Zurich.

Job description :

The programme

This is a unique 18-month experience where we offer you a permanent position along with a specific programme with rotations in different teams to build your expertise and professional skills.

Based on a permanent contract, our **graduate programme** includes on- and off-the-job components, placing the emphasis on teamwork but also exploring your skill sets, furthering your development and setting specific objectives.

Your team

The **Technology & Operations** (Tech&Ops) division is responsible for some of Pictet Group's key innovations, while ensuring the business continuity of operations and the development of custodian and fund administration services.

Join the transformation journey with **Pictet Group's Technology Strategy & Innovation** team, part of the dynamic Technology & Operations division. As a leader in the Swiss financial landscape, Pictet stands today at the forefront of generative AI technologies.

We are looking for a Graduate to join our newly-created **AI Centre of Excellence** within Pictet's Technology & Operations division. You will play a pivotal role in pioneering projects that shape the future of banking by leveraging generative AI technologies such as large language models (LLMs).

This role offers a unique opportunity to develop your professional skills, gain deep insights into cutting-edge AI technologies and contribute to innovative solutions that will have a lasting impact on the financial industry.

Your role

Your journey will consist of various rotations within the Group, enabling you to acquire various skills to position yourself in an optimal fashion the first years of your career at Pictet:

AI Centre of Excellence (core team): you will familiarise yourself with your environment, activities, strategic projects and the technologies used, including AI model integration and operational efficiency projects.

Product ownership of a GenAI-based assistant within the Pictet Wealth Management digital platform: you will be responsible for defining product requirements, collaborating with development teams and ensuring the successful deployment of the GenAI-based assistant.

Delve into machine learning for investment within the PAM Quest AI team: you will work on developing and implementing machine learning models to enhance investment strategies, analyse financial data and provide insights to support decision-making.

At the end of this journey, you will be able to take on the role of AI Engineer in the AI Centre of Excellence.

Your profile

Recent Master's degree in Computer Science, Communication Systems or a related field.

Maximum two years of experience after graduation working for an international company or in a multicultural environment.

Experience in machine learning, data science techniques and knowledge of the pandas library.

Proven track record of at least 12 months working with ChatGPT or equivalent conversational AI platforms.

Demonstrated ability to work autonomously while fostering teamwork and collaboration.

Excellent problem-solving skills, critical thinking and meticulous attention to detail.

Strong communication skills and the ability to liaise effectively with clients and team members alike.

Fluency in French and English (both written and oral), with other languages beneficial but not required.

Must be resident in Switzerland or willing to relocate.

Start date: 1 September or 1 October 2025
