A.I.: From dreams to reality

Featuring live demos!

Learn and interact with our panel of experts

Everyone is talking about artificial intelligence but in reality the AI field is not new;
it all started a long time ago...

- Why the excitement now?
- What are the fields impacted by AI?
- How is AI changing business and society?

- What is the state of AI today?
- What are the real-world applications?
- What about the future?

Prof. Christian Pellegrini
Professor Emeritus University of Geneva
Artificial intelligence, artificial neural
network, data mining and machine
learning

Mr. Marc-Elian Bégin
CEO and co-founder, SixSq
Software engineer and entrepreneur
At the frontier between innovation
and business

Mrs. Shalini Trefzer
Senior research assistant HEPIA
Environmental engineer
Business developer for emerging
AI companies

Dr. Guido Bologna
Senior lecturer HEPIA
Data sciences, statistical learning
methods & computational intelligence

Mr. Jordi Domenech
Head of IT at Piguet Galland & Cie SA
Technologist waling the fine line between
tradition and innovation

Prof. Nabil Abdennadher
Full professor HES-SO HEPIA
Head of the inIT research institute
High performance, edge & cloud
computing

Mr. Théophile Allard
VP of Engineering Neural Concept
Mathematics and machine learning
AI-enhanced engineering

Free A.I. event!

Thursday the 31st of October from 18h30 at HEPIA (rue de la Prairie 4, Geneva)
Followed by a networking session!

please register on
www.meetup.com/AI-from-dreams-to-reality
or ai-from-dreams-to-reality.eventbrite.ch

Be surprised, get excited and feel inspired!
