Résumé (en Anglais)

KM4MK is a contribution to the development of an integrated eLearning solution for teaching Mathematics to kids according to an innovative approach, namely Karismath. The objective of KM4MK is to develop a mobile solution for accessing, using, and sharing interactive worksheets. Three main aspects will be focused: the usability and the interactivity of mobile worksheets, the integration and interoperability of mobile clients with the global Web-based solution, and the elaboration of efficient protection mechanism for P2P worksheets sharing.
